

SFDB_ISHLDY

Last Modified on 01/19/2017 12:21 am CST

- [C/C++](#)
- [.Net](#)

```
int __stdcall SFDB_ISHLDY(LONG    argDate,  
                          LPLONG  zdates,  
                          size_t  nLen,  
                          LPCTSTR szHolidays  
                          )
```

Returns TRUE when the start date falls on a holiday.

Returns

status code of the operation

Return values

NDK_TRUE given date falls on holiday

NDK_FALSE given date does not fall on holiday

Else Error code (see [SFMacros.h](#))

Parameters

[in] **argDate** is a serial date number that represents a given date

[in] **zdates** is an array of holidays dates; each expressed as a serial number (i.e. number of days since 1.1.1970)

[in] **nLen** is the number of holiday dates.

[in] **szHolidays** is a (:_) separated list of holiday codes

Examples:

[dbm_rollover.cpp](#).

```
int SFDB_ISHLDY(int    argDate,  
                long[] zdates,  
                UIntPtr nSize,  
                string  szHolidays  
                )
```

Returns TRUE when the start date falls on a holiday.

Returns

status code of the operation

Return values

NDK_TRUE given date falls on holiday

NDK_FALSE given date does not fall on holiday

Else Error code (see [SFMacros.h](#))

Parameters

[in] **argDate** is a serial date number that represents a given date

[in] **zdates** is an array of holidays dates; each expressed as a serial number (i.e. number of days since 1.1.1970)

[in] **nLen** is the number of holiday dates.

[in] **szHolidays** is a (:_) separated list of holiday codes

Remarks

- 1.
- 2.

Exceptions

| Exception Type | Condition |
|----------------|-----------|
| None | N/A |

Requirements

| | |
|------------------|--------------|
| Namespace | NumXLAPI |
| Class | SFDBM |
| Scope | Public |
| Lifetime | Static |
| Package | NumXLAPI.DLL |
