How do I query the license key, activation code, and/or expiration date programmatically?

Last Modified on 03/18/2016 2:50 pm CDT

In the licensing system, there are several functions that does just that: SFLUC_LICENSE_KEY, SFLUC_LICENSE_EXPIRY, etc.

For more details and/or examples, please refer to the "**Licensing**" section in the reference manual.
