My customer's license is about to expire. How do I get it renewed?

Last Modified on 03/18/2016 2:51 pm CDT

After the license key is renewed, you will need to generate a new activation code for each machine and copy it in the NumXL.lic file.

As a vendor, you may generate the activation codes for your customers using the online webform and send them a new NumXL.lic file to copy into your application folder.
